Metamon– MemeCoin White Paper

"Where Memes Become Money."

Introduction

In the age of internet culture, memes are no longer just entertainment — they are digital language, cultural currency, and now, actual value. Metamon is a meme coin built to reward creators, unite communities, and embrace the chaos of the internet through humor, decentralized ownership, and shared identity.

Mission & Vision

Metamon is a play-to-earn (P2E) blockchain game developed by Radio Caca (RACA), launched in October 2021 on the Binance Smart Chain (BSC).

RACA closed this Metamon game and the game was designed to be integrated into Radio Caca's Metaverse project, the United States of Mars (USM).

We initiate Metamon Meme coin in order to wake our Metamon community.A real Meme coin belong to Our community who was holding and nourish Metamon forever.

Metamon can't stay asleep forever, and is here to make memecoins great again.

Metamon's mission is to bring value to internet culture by empowering meme creators, embracing viral energy, and giving every community member a stake in something fun, chaotic, and surprisingly powerful.

"Meme first. Utility next. Vibes always."

What Makes Metamon Unique?

- • Purely Community–Driven: No VC, no centralized control — only a strong, growing community.

- • Meme–to–Earn Ecosystem: Earn Metamon by submitting memes, contests, or contributing to growth.

- • NFT Integration: NFTs grant rewards, airdrop access, and DAO rights.

- • Meme DAO: Decisions made by holders via Snapshot voting.

Tokenomics

Total Supply: 10,000,000,000 Metamon

Contract Address: 0xf08EbD7BB74c791218e54b515eC1B05dDe0d7C1c

Allocation	Percentage	Description
Pre–sale on pinksale for DEX Listing	30%	Used to fund liquidity pools and exchange listing
Airdrop to Metamon NFT Holders	20%	Distributed to early supporters and Metamon NFT owners
Marketing & Partnerships	20%	Campaigns, influencers, contests
Community Building Fund	20%	Grants, bounties, contributor rewards
Reserve & Others	10%	Future development and emergency use

Roadmap

- Phase 1: Birth of the Meme

  - – Launch website, socials, and white paper

- – Pre–sale on pinksale finance to fund for listing on DEX:

30% amount to 3,000,000,000.00 Metamon

- – Community formation & Airdrop:

Airdrop to Metamon NFT owners before listing on DEX. This dropped token will be locked for 6 months and released gradually: 20% to 2,000,000,000.00 Metamon.

- Phase 2: Expansion

  - – Meme–to–Earn platform launch
  - – DAO setup & first community proposals
  - – NFT staking for rewards
  - – Marketing blitz with meme creators

- Phase 3: Listing

  - – Listing on Uniswap and DEX

- Phase 4: Meme Empire

  - – Meme game or arcade (play–for–lolz)
  - – Mobile meme wallet release
  - – Cross–chain launch (e.g., BSC, Polygon)

Security & Transparency

- Public smart contract audits (to be published)

- Community–visible treasury wallets

- No team allocation — all tokens distributed transparently

Governance

Metamon will be governed by its community through a DAO model.

Voting power is based on Matemon holdings and NFT ownership.

All major decisions are put to a vote via Snapshot.

Community

The real utility of Metamon is its people — creators, spammers, and memelords.

Without community, it's just another token.

Disclaimer

Metamon is a meme coin. It has no inherent financial value, utility, or promise.

Participate for the culture, not guaranteed gains. DYOR (Do Your Own Research).

Closing Words

Metamon is not here to change the world. It's here to make it laugh — and maybe, just maybe, get listed on Binance.

"If DOGE can do it, why not us?"
